Nikita Lobanov

CS at BCIT | Full-Stack Engineer

Richmond, British Columbia, Canada

Summary

I am a senior computer science student at BCIT specializing in full-stack web development with hands-on experience building scalable applications and system integrations.

I have practical experience developing REST APIs, building high-performance React frontends, and real-time systems, along with working on AI-powered applications and complex database systems.

Currently seeking backend or full-stack development roles where I can apply my technical skills in modern web technologies and continue learning.

___

Experience

Blau & Associates
Cook - The Victor
June 2024 - Present (1 year 3 months)
Vancouver, British Columbia, Canada

Seaspan Corporation
Software Development Intern
May 2024 - August 2024 (4 months)
Vancouver, British Columbia, Canada

Worked in Application Support at Seaspan, building integrations between business systems and providing technical support. Built a Spring Boot REST API that automated data processing between Oracle ERP and Excel for accounts payable, eliminating 160+ hours of monthly manual work. Also developed React dashboards for monitoring vessel performance metrics across their 227-ship fleet and helped coordinate IT support during the global July 2024 CrowdStrike outage, guiding 80+ employees through system recovery.

Affistash
Full Stack Web Developer
March 2023 - April 2024 (1 year 2 months)

Built frontend interfaces for Affistash, an AI platform that helps brands find affiliate partners automatically. Developed the main partner discovery dashboard in React, allowing brands to see detailed analytics about potential affiliates including their traffic data and niche focus. Streamlining the brands affiliate recruitment from a weeks-long manual process to finding hundreds of quality partners in minutes.

Browns Socialhouse - Premier Restaurant Group
Line Cook
May 2022 - July 2023 (1 year 3 months)
Richmond, British Columbia, Canada

DDS Wireless
Information Technology Intern
June 2018 - August 2020 (2 years 3 months)
Richmond, British Columbia, Canada

Worked in the IT department on troubleshooting hardware problems and technical support tasks, including Windows OS installations for new computers & corrupted computers, ethernet cable routing and network infrastructure setup, and comprehensive hardware diagnostics. Performed component-level troubleshooting by testing RAM modules, identifying faulty motherboard slots, and validating functionality of refurbished equipment.

―――――

Education

British Columbia Institute of Technology
Bachelor of Science - BS, Full Stack Web Development · (September 2022 - April 2026)
